

## INSIGHTS+

### Better insight for smarter safety decisions

Say goodbye to relying on out-of-date or incomplete data to inform your health and safety decisions.

With an improved reporting culture organisations start to report larger volumes of important safety data. Insights+ makes it easy to analyse and easily share all this data, quickly and accurately.

And critically, in addition to tracking traditional lagging indicators, Insights+ helps you to understand the trends from your leading indicators such as hazards and observations, so you can better predict where preventative intervention will be most effective.

You'll spend less time tracking health and safety performance and more time encouraging positive conversations around health and safety.

## EXPECTED OUTCOMES

**Visibility** - Truly understand what is happening in your organisation with an up-to-date picture of your health and safety performance.

**Create a culture of positive safety conversation** - Encourage more people to talk about safety through the availability of clear and simple insights.

**Robust analytical capabilities** - Speed up reporting and analyse data more accurately. Identify, track and predict trends and leading indicators.

**Empowered decisions** - Monitor leading indicators to ensure you intervene when needed or identify positive changes.

# HOW DOES IT WORK?

**Create relevant dashboards** – Tailor pre-configured best practice dashboards or set up new dashboards for different roles in your organisation.

**Review and monitor your performance when needed** – Track leading indicators and monitor KPIs more accurately. Information is presented in a simple format. Drill down, filter and link to underlying records.

**Share Reports** – Make sure everybody has the data they need. Download and share dashboards in minutes. Schedule reports for regular delivery to key stakeholders.

**Gamification** – Promote friendly competition between locations and departments through data insights.

## Proactively Manage Safety with Assure

Assure comes with a suite of standard features that support effective health and safety management. Create a flow of information by capturing data on the mobile web app AssureGO+. This triggers notifications to prompt next steps and ensures that any required actions are closed out efficiently and effectively.

All activities can be visualised and analysed in easy-to-use, configurable dashboards. This enables organisations to make the right strategic decisions to drive continuous improvement.
