

Empower Your Mobile Workforce

Easy-to-use, mobile tools enable greater collaboration, productivity and enhanced reporting for mobile and remote employees.

Organizations are embracing mobile apps to boost participation in environment, health, safety, and sustainability (EHS&S) while reducing cost and complexity. Our mobile app Roam, offers multiple possibilities to transform your EHS&S processes, all within a single, native app.

Convenient & paperless approval with e-signature

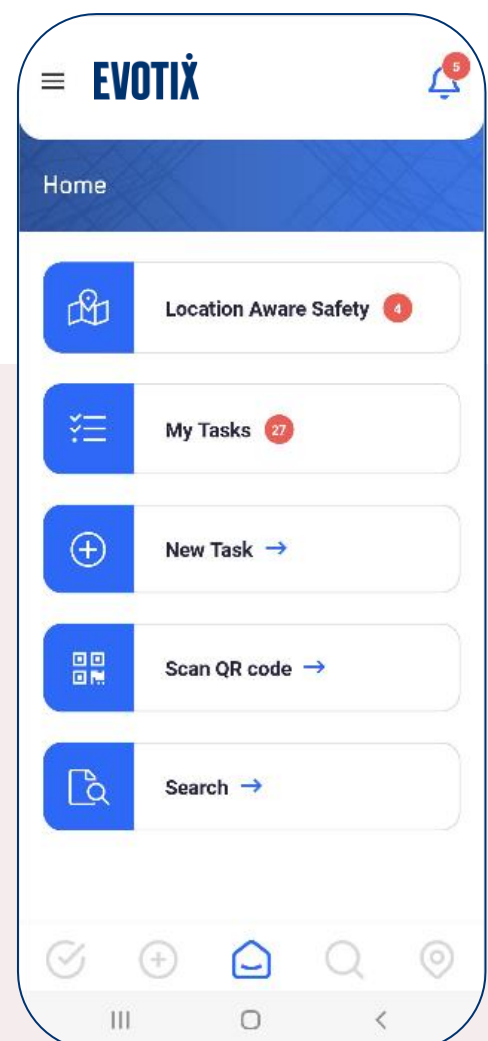

Location aware delivers critical information where needed

Instant alerts & notifications for accountability and awareness

Multi-lingual support to break down communication barriers

Cut out redundant tasks and become fully paperless:

Our mobile app Roam, enables users to report incidents and accidents, near misses, hazards, inspections and more – anytime and anywhere, even when offline.

It is simple and easy to use supporting high user adoption and engagement with your EHS&S initiatives. With speech-to-text, geo-location, QR code support, and the ability to take, attach and annotate photos, workers will find it easy and fast to capture data. Companies benefit from real-time EHS&S information that can be acted on quickly.

Get more value from your EHS and Sustainability software:

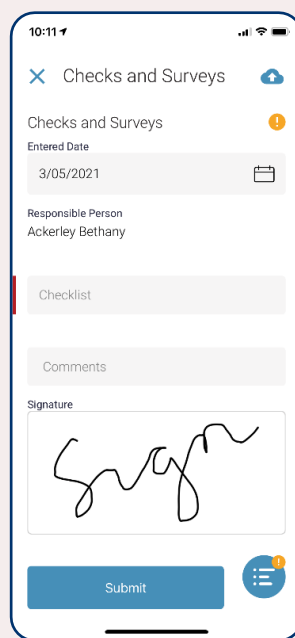

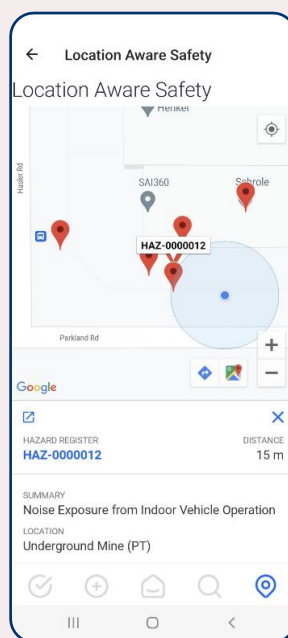

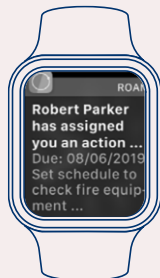

The Roam mobile app is the perfect companion to the web application and is much more than a data capture tool.

Forms and workflows available in the web application can be made available through the mobile app, allowing users to manage EHS&S processes from their mobile devices. In addition, forms and workflows are fully configurable, so they can be tailored to your unique business needs.

Connect and Engage Workers in Managing EHS and Sustainability

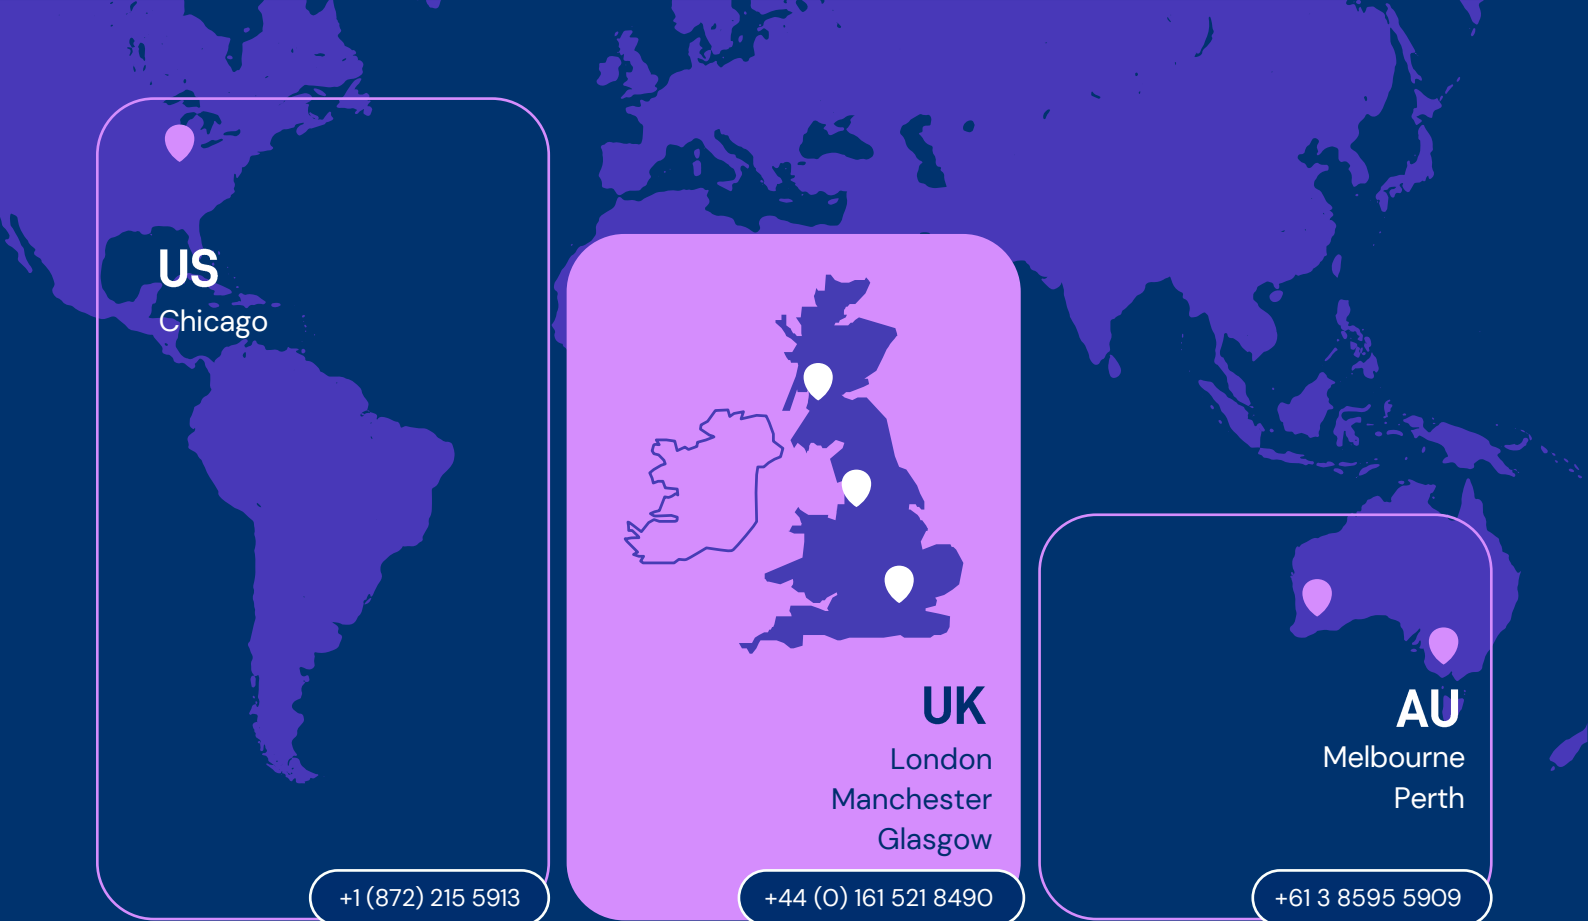

Via the Roam mobile app, workers can view and complete all tasks that have been assigned to them, such as Actions, Investigations, Audits, and Inspections. Instant notifications allow real-time messaging of assigned tasks, safety alerts, or any urgent information to be sent to workers in the field. Workers can also search and access critical information such as Hazards, Incidents, Chemicals, and Job Safety Analysis to make informed decisions when undertaking a task.

Roam's Location-Aware Safety helps users get information relevant to their GPS location, ensuring critical information is delivered at the right place and time.

Features:

- Enable any of your environment, health, safety, and sustainability business processes on the mobile app.
- Consistent user experience across workflows between the mobile app and web application.
- View and manage your assigned actions and tasks anytime and anywhere.
- Location-Aware Safety.
- QR Code Support.
- Capture electronic signatures.
- Instant notifications delivered to mobile devices.
- Speech-to-text capabilities.
- Geo-location tracking.
- Take photos, attach and annotate as evidence.
- Configurable questionnaires and checklists.
- Multi-lingual support.
- Data security consistent across Roam mobile app and web application.
- Support for iOS, Android, and Windows.
